

# Andea set to provide DELMIA Apriso MES services for Straumann

20.6.2016  
Krakow, Poland

Straumann, a pioneer and global leader in implant, restorative and regenerative dentistry, has selected Andea, an experienced provider of manufacturing services and solutions, as its strategic MES services provider. Andea will provide application maintenance, development and rollout services for Straumann's DELMIA Apriso MES deployment.

Beyond the typical challenges encountered by most global manufacturing companies, Straumann also operates in a strictly regulated environment and sets the highest standards for production controls, process validation and conformity to regulations. A fundamental requirement of operating in this regulated environment is that every production step must be thoroughly and correctly documented. To ensure compliance with governing bodies and to continually make strides in advancing production efficiency, Straumann has implemented DELMIA's Apriso MES solution. Andea has been appointed to provide Straumann with MES application maintenance, enhancement development, and rollout services. The team at Andea has experience working with clients in regulated industries and is well versed in providing services and solutions to meet these distinct demands.

Pawel Mierzwa, Managing Director of Sales at Andea,  
commented:

*We are proud of the opportunity to provide our services to yet another industry leader such as Straumann. The precision and innovation that goes into their products, which benefit the quality of life of millions of people worldwide, is uplifting. Our team is eager to work with Straumann and contribute to further enhancement of their MES solution.*

Andea offers a broad spectrum of MES services and solutions; from conducting assessments and building strategic manufacturing systems to managing global rollouts. It was started by a group of MES professionals who saw the potential in providing their expertise along with their customer-centric approach. Andea delivers services globally from offices in Krakow, Poland and Long Beach, California. More information on the full scope of Andea's services and solutions can be found at [andea.com](http://andea.com).
